

Looking for skilled electricians?

For more than three decades, we've honed our craft to ensure electrical contractors and subcontractors have the right people with the right tools, on-site and on time.

Wired to find the workers you need

As the demand for skilled electricians climbs, businesses like yours need a staffing partner they can call on to help them staff or supplement their workforce. PeopleReady Skilled Trades (PRST) has you covered. Whether you're roughing-in electrical for a custom home or have won a bid on a big commercial or industrial project, we'll help you find the electricians you need, always with the right skills and qualifications.

A schematic you can count on

Our local recruiters are experts in sourcing, screening and testing tradespeople with specialized knowledge in all phases of electrical construction. Every electrician undergoes an extensive process with interviews and in-depth assessments — including a written skills evaluation and hands-on pipe bending assessment if required. So, when our tradespeople step on your job site, you can be confident they have what it takes to get your job done right.

Proven commitment to safety

PeopleReady Skilled Trades is home to an in-depth worker safety screening and training process. That's why we created our BeSafe Program and Right Match Dispatch philosophy, offer OSHA 10- and 30-hour trainings at no cost and provide Personal Protective Equipment (PPE) to all employees. For your business, this means we only deliver the kind of workers you want on your job sites—ones who are safety-minded, held to the highest standard and respectful of other workers. That's what we call peace of mind!

The power to do more

Backed by the power of TrueBlue (NYSE: TBI), we offer unparalleled resources and experience.

We Are Ready™ to fill your open electrician positions
