

# Flexible staffing solutions for commercial solar projects

PRST helps contractors find the skilled laborers they need to complete solar projects on time and under budget, where and when they need them.

## A greener future

The demand for renewable power solutions, solar installers and other skilled trades roles has increased dramatically. Combine this with a slim number of workers entering the field, and you'll quickly find that the already challenging task of finding solar installers is becoming even more difficult. We can help.

At PeopleReady Skilled Trades (PRST), we know that the faster we can help you install sustainable solutions, the more we can both be part of creating a renewable future. So, we hire a variety of solar workers and then dispatch them to commercial and other small-scale projects around the country when businesses like yours need an extra hand. Lean on us for your solar installer and solar project staffing needs for projects within 1 megawatt to 3.5 gigawatts.

## A system you can count on

Our local recruiters are experts in sourcing, screening and testing tradespeople with specialized knowledge in all phases of solar installation. Every tradesperson undergoes an extensive hiring and vetting process with interviews and in-depth assessments. So, when our tradespeople step on your jobsite, you can be confident they have what it takes to get your job done right.

## Proven commitment to safety

PRST is home to an in-depth worker safety screening and training process. That's why we created our BeSafe Program and Right Match Dispatch philosophy, offer OSHA 10- and 30-hour trainings at no cost and provide Personal Protective Equipment (PPE) to all employees. For your business, this means we only deliver the kind of workers you want on your jobsites — ones who are safety-minded, held to the highest standard and respectful of other workers.

## Team PRST builds with you
